

# Malachi Diehl

## Full Stack Developer

diehl.malachi990@gmail.com | github.com/MSDiehl | linkedin.com/in/malachi-diehl-04b961251

## Profile

Full stack developer focused on responsive web applications, practical API design, and user experiences that make complex workflows easier to use.

## Technical Skills

Frontend: React, TypeScript, JavaScript, HTML, CSS.

Backend: .NET, C#, PostgreSQL, API design, relational data modeling.

Tools: Git, GitHub, Docker, Visual Studio Code, OpenAI API.

## Projects

### AnimeHub (V1)

Full stack anime tracking app for discovery, personal watch lists, schedules, detailed pages, and episode-scoped discussions.

Built with React, TypeScript, .NET, C#, and PostgreSQL.

### Random Project Generator

OpenAI API powered tool that turns prompts, quality settings, and stack preferences into generated project ideas with an interactive waiting flow.

Built with Python, JavaScript, and HTML.

## Focus

I am interested in full stack and frontend roles where UX, reliable APIs, and maintainable product engineering all matter.
